

Spec Components

Purpose: Help designers create one page of specs for developers instead of many pages. These components make it possible to get everything onto one document when creating specs. I've added them here so you can easily grab them to use. Please use these with the typography tags.

COLOR TAGS

Primary

Secondary

Light Gray

Gray

Med Gray

Dark Gray

Example:

.Isn-sm Med Gray

.Isn-sm Med Gray

These are nice because you can put them right on top of other elements and not take up additional space. Or next to the type tag!

SPACING TAGS

10 PX

10 PX

15 PX

15 PX

20 PX

20 PX

25 PX

25 PX

ALT SPACING

Use Sketch Measure Plugin for things you cant put the blue spacers between. ex: height of a table row OR width and height of an input field.

65px

22px

ALIGNMENT

base align

.Isn-body

Center Align

.Isn-body

Left Align

.Isn-body

Right Align

.Isn-body

Vertically Center

.Isn-body

CALLOUT TEXT

Use these examples to callout little additional bits of information:

1px Line

OR

All lines are 0.5 thickness & Gray

You can also use this text as a callout

Additional Information: You can put this over something to explain specific instructions. & make the box larger & smaller

There can be other variations of this informative box.
